PROFESSIONAL PROJECTS

Akilli Adisyon | Smart POS System May 2015

🖵 akilliadisyon.com
- Developed the front-end with Node.js, NWJS.io, jQuery, Semantic UI and the backend with C# &WCF
- Provides smart solutions to restaurants, cafes, and bars such as table management, stock management, takeaway management, CRM, Multi-Branch management, etc. with its modular system
- Reached to 30+ cooperates by providing SaaS or on-premises services
- Created the Progrressive Web App of the System using React in Jan 2018 that allowed clients to do their daily tasks and access to the advanced reporting system from their mobile devices and tablets.

Kardes Payi Association | Administration Tool Jan 2020

🖵 app.kardespayi.org
- Built as a MERN (MongoDB, Express, React, Node.js) application for the association to keep track of their financial and charitable activities.
- Coded the front-end with Ant Design (UI Framework), Redux, Redux-Saga, React-Router-Dom, and Apexcharts on top of React.
- Constructed as a serverless architecture that allows 1500+ users use the app.

Twitter Analyzer| Private Project Fall 2015

🖵 github.com/sefaokumus/twAnalyzer
- Designed and created both the frontend and the backend from sketch for an organization as a private project who wanted to monitor its users' twitter activities (around 100k users) live.
- Improved the performance by establishing 70-100 asynchronous connections to the Rest API.

MAKER PROJECTS
